

Panthenol HA Gel

Hyaluronic acid with panthenol and niacinamide in a light, oil-free gel.

HOW TO USE

Morning and evening, onto damp skin, after your serum. For oily or congested skin this is your moisturiser — nothing else is needed over it. If your skin is dry, follow with a richer cream.

INGREDIENTS

Water, Glycerin, Propylene Glycol, Hyaluronic Acid, Panthenol, Aloe Vera Liquid, Sodium Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Trolamine, Carbomer, Niacinamide, Isohexadecane, Polysorbate 80, Potassium Sorbate

WHAT TO EXPECT

Immediate comfort and less tightness. Oil-free, so it suits congested skin where a cream would be too much. Apply to damp rather than dry skin — that is where it works best.

For external use only. Avoid the eye area. Discontinue if irritation occurs.

Full ingredient list, batch and expiry on the bottle. Store below 25°C.
